

Translucent polycarbonate

Translucent geometry for overlap with the metal profile “Trapezoidal sheet metal 30/209”, manufactured by extrusion with polycarbonate granules protected on one or two sides from ultraviolet rays by coextrusion of UV absorbers, which guarantees resistance against ageing and maintains all its characteristics over time.

| GENERAL CHARACTERISTICS | |
|-------------------------|-----------------------|
| Weight | 1.5 kg/m ² |
| Average thickness | 1 mm |
| LIGHT TRANSMISSION | |
| Transparent | 88% |
| Opal | 51% |

Possibility of cutting to length.
Standard length: 6,000 mm

Benefits

- Great light diffusion
- Long useful life
- Easy installation
- Good fire behaviour properties Class BS2 DO
- High mechanical resistance
- High chemical resistance
- High impact resistance
- Thermostability
- Lower rate of yellowing over time

Polyethylene seal

Trapezoidal watertight seal manufactured with cross-linked polyethylene foam with a density of 25 kg/m³ to prevent the entry of dirt, animals, water and air in joints between corrugated sheet metal model 30/209 and finishes.
