

At the service of your ideas.

Experience

Since 1968 we have been striving to transform your ideas into reality, manufacturing cold-formed steel profiles.

Since then, we have constantly been pioneers in our sector, addressing the continual demands and adapting to each and every one of the needs that have come knocking at our door.

We grow alongside you

Innovation

Our team's goal is to use technology to meet to your needs, offering the best possible solutions.

Brausoft

A computer tool created in-house which offers numerous optimisations in calculating profiles.

Who are we?

Our extensive experience and the steady improvement of our production capacity have ensured that we are a benchmark in cold-formed steel profiles on both national and international levels.

We have an extensive range of profiles, allowing us to adapt to all market requirements.

Profiles are us

Flexibility
to adapt to your needs.

Experience
after 50 years at your side.

Proximity
in each project.

Guidance
that is bespoke and personalised.

Professionalism and a first-class team
at your service.

What do we do?

A solution for every project.

Our professionalism and experience have made us your trusted partner in developing joint solutions for a wide range of applications.

One of the BRAUSA brand's greatest assets is the high level of versatility offered by our products.

Personalisation

Excellence in customer service is our motto.

We set ourselves apart through our personalised service and the commitment we assume with our clients. Our team is fully committed in every phase of the process, from design to delivery, without overlooking even the smallest detail.

From the client's idea right up to delivery, **the solutions BRAUSA offers are creative, innovative, profitable and, above all, unique.**

Bespoke guidance.

How do we do it?

Production process

Working with you in each step, in each decision.

To reach the optimal solution together, at BRAUSA we apply our experience, professionalism and technology in the production process, **to transform each idea into a reality.**

Customer requirements

Commercial and technical agreement

Engineering and tool design

Technology

We have modern production systems in which we are constantly investing, always seeking the **best possible technology**. We are capable of developing **complete projects** thanks to our technical design capabilities, of which all **our solutions** are examples.

- **Profiles**
Various lines with a wide range of shapes.
- **Folding**
Folding machines capable of working up to 14 metres in tandem.
- **Punching**
Flexible systems capable of many different types of machining.
- **Machining**
Stamping, cutting, die-cutting, marking, etc.
- **Cutting lines**
Versatility and high levels of flexibility in terms of availability of material.

Manufacture

Quality control

Packaging and delivery

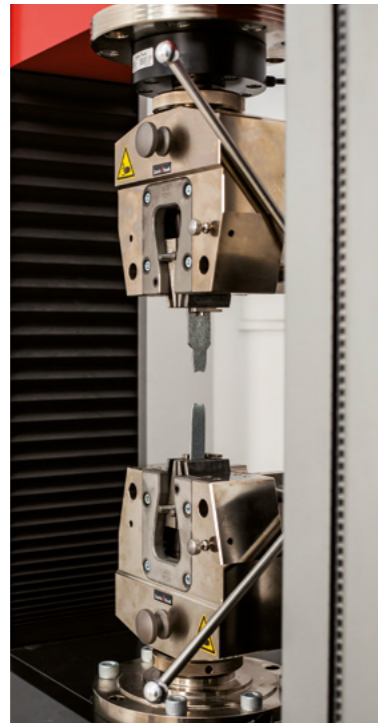

Quality

Controls

At BRAUSA we employ the most stringent controls in our production processes, from the reception of material to the manufacture and monitoring of the final delivery.

In our laboratory, we perform our own checks on materials and their properties, using our own test equipment.

Certification

Our management, design and manufacturing processes adhere to the UNE ISO 9001:2015 quality control system. BRAUSA certifies that it complies with factory production control, in accordance with the EN 1090-1:2009+A1:2012 standard.

Commitment to the environment

Steel offers a wide range of advantages.

Thanks to these benefits, by reducing the thickness of cold-laminated profiles, we cut production costs, thus contributing to our commitment to the environment.

*Exceptional tensile and compressive strength
· Firmness · Durability · Ductility · Toughness*

Control of production processes

Quality control of products

Control of delivery

Materials

Our stock of materials covers the broadest possible range of quality and thickness.

Profiles

From the identification of pieces to the creation of labels bearing the client's logo, we offer customised marking on each and every profile.

Logistics

Our list of logistic services provides ample coverage for any needs you may have.

- **Packaging and loading**
- **Pallets and woods treated for exportation**
- **Container loading**
- **Possibility of loading in national and international LCL shipments**
- **Export formalities**

Pre-lacquered steel

A Our formula

Reaching the optimal solution together

Professionalism and experience

Our greatest asset

Our vocation? Placing all our experience and guidance **at the service of your ideas.**

Our guarantee? Committed for over **50 years** to the trust you place in us. We are capable of providing solutions of the highest quality thanks to an unparalleled **team** who ensure that we can rise to the commitments we make with you.

Your project is our project

We make your project our own, and to do so, we need to collaborate in the process. **Engineers, architects, constructors and installers all work together** to provide a process that is effective and, above all, personalised.

At the service of your ideas.
